QR CODES Explained

01

Accessing the Online Portal:

Scanning the QR code will take you to an online portal specifically for that conveyor system.

This portal includes details about all mk conveyors and devices used in the system.

02

Understanding the Webpage:

The webpage shows information for all conveyors on that order.

In the Example: The drawing number "6AA.13.146" shown on the QR label is the overall conveyor system drawing number.

03

Specific Conveyor Information:

The webpage also shows specific information for that specific conveyor.

In the Example: The first drawing number on the serial number tag, "5AJ.40.892," is for the specific conveyor model SRF-P 2010 with serial number 12603.

04

View Drawings and Spare Parts:

You can open the drawing file and the spare parts list for to see the conveyor and the recommended spare parts.

If you need more information or want to order spare parts, contact information is available at the bottom of the screen.

05

Operating Manuals and Wiring Info:

The portal provides operating manuals for all conveyors in the system as well as any related wiring diagrams.

In the example you can see the SRF-P 2010 associated with serial number 12603.
